Automation and Control

Custom Built Control Panels,
Electrical Distribution
Systems and Software Solutions

Company Profile

- Automation and Control Limited build high quality control panels for a wide range of customer applications.
- ACL manufacture, supply and install to client designs or provide an 'in house' design and build service for MCC assembly, control and distribution systems and software integration.
- ACL's customer centred approach ensures that quality workmanship is combined with competitive pricing and a professional and personal service.

Customer Commitment

Automation and Control's commitment to customer service brings quality and excellence to our products. ACL technicians, supervisors and managers are qualified and trained to provide off and on site testing, inspection and superior health and safety standards for industries including: Water and wastewater treatment; food and drinks; chemical; pharmaceutical; electro plating/metal finishing and tanneries etc.

ACL offers a responsive and efficient service to ensure our scope of supply is delivered on time and to budgetary targets. Whether it's a new build or upgrading existing infrastructure, we work with our customers to meet the specific project needs and objectives.

quality and excellence at competitive prices

Products and Services

Control Panels:

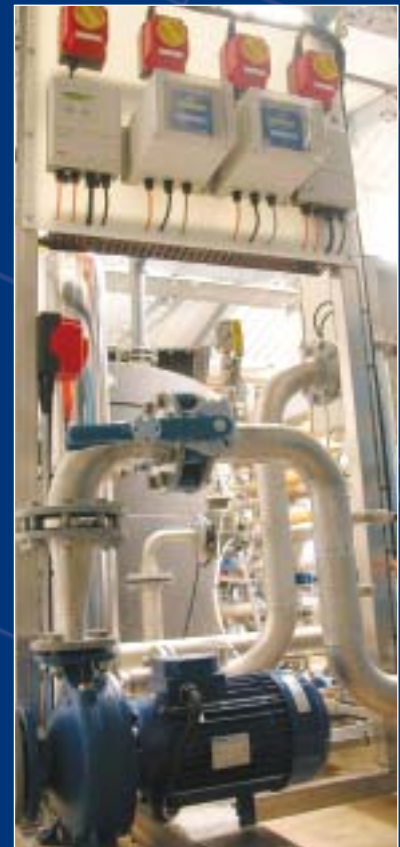

Automation and Control supplies a wide range of electrical panels from small distribution boards through to large Motor Control Centres (MCC's). We focus on delivering control panels to suit our customer needs. Whether an OEM or 'end user' we offer a solution that integrates up to date technology with superior engineering. Production is carefully monitored to ensure that customer specifications and timescales are met. Our 'In house' testing facility also allows all our panels to be rigorously checked and 'dry' commissioned prior to leaving our works.

Data Acquisition, Integrated Automation and Control Systems:

In addition, we can design and deliver fully automated control systems which can include PLC through to full SCADA, data acquisition software and Ethernet/PROFIBUS networks.

- PLC's – Siemens, Mitsubishi, Allen Bradley and others to client specifications
- Operator interface, HMI
- Ethernet, PROFIBUS, ASI and proprietary networks
- Remote GSM modem, Internet access
- Electro pneumatic automation

Installation, Site Wiring, Maintenance and Servicing:

ACL's electrical installation teams provide site services to complete the total service package from design, through supply, to integration and customer support. Installations range from small package plant, MCC's and pumping chambers to large 'turnkey' projects incorporating MCC, PLC, SCADA, network control and remote access. Installation, service support and after sales maintenance is carried out by qualified and experienced personnel. Automation and Control Limited are an approved contractor under the Electrical Contractors' Association (ECA) scheme.

customer focus and efficiency, delivered safely

Customer Sectors

- Water and wastewater treatment
- Food and drinks
- Chemical
- Pharmaceutical
- Machine automation
- Metal finishing/plating
- Tanneries
- Industrial gases

Capabilities

- Single door and modular MCC's
- Installation and site wiring
- Control system design and development
- Maintenance and servicing
- Automated solutions
- Ethernet, PROFIBUS, ASI and proprietary networks
- GSM modem, Internet remote access
- Electro pneumatic automation

Customer Commitment

- Quality partnership
- Reliability
- Service
- Health and safety
- Training
