Aquabio Limited
General Statement of Environmental Policy

The management of Aquabio Limited is committed to managing its activities in such a way safeguard the interests and concerns of all it's customers, employees and the general public.

Aquabio recognises that some of its activities may have an effect (beneficial or not beneficial) on the environment and that concern for the environment and continual improvement in environmental performance are an integral part of our successful and sustainable future. We therefore endeavour where possible and practical to minimise the environmental impact of design, specification, procedures and operations.

To achieve this goal we will seek to:

- Meet all applicable legislation, government guidelines, and industry codes of practice.
- Review activities to ensure a programme of ongoing improvement and minimise environmental impact through our activities.
- Implement this policy in our operations and incorporate appropriate objectives, targets, standards and procedures to achieve this objective.
- Wherever possible and practicable, use lowest impact resources, minimising waste, conserve energy and water and promoting recycling and reuse.
- Dissipate our policy to our employees and subcontractors to help ensure that their working activities are carried out with this Policy in mind.
- Implement site-specific environmental management for construction activities.

Signed : 

Name: S C Goodwin

Position : Director, 17/09/2007
